

In regards to NAB's petition 04-160, I do not understand why I can not listen to traffic or weather in selected cities that I may be visiting. If the NAB can assure me constant updates and where on the radio this information is located that would be a start. However, just wanting to take channels out of a service I have subscribed to is not a benefit to the American public. My thoughts are that the FCC is to provide transmission services that benefit the American public. I fail to see where taking away these channels benefit the majority of the American public.
